HOW IT WORKS

The invisible surface fingerprint

Scanning
object surface only

The gadgets

- iPhone 13, 14 & 15 pro/max
- industrial cameras

Surface Analysis
analyze features

The Surface

- is analyzed using AI and computer vision technology

Fingerprint Creation
create digital surface ID

The Fingerprint

- is invisible and unique
- is audited via distributed ledger

Verification
authenticate / verify fingerprint

The Verification

- compares an object's surface to its fingerprint
- shows a match verifying the fingerprint's authenticity
